

How to hang

WHAT YOU'LL NEED

Measuring tape
or ruler

Pencil

Picture hook
or nail

Hammer

Level

Decide where you want to hang your frame. Place the frame against the wall and use a pencil line to indicate the top-center of the frame.

Measure the distance between the top of the frame and the center of the sawtooth hanger. Use a pencil to mark this measurement beneath your original pencil line.

Using a hammer, install a picture hook or nail into the penciled mark you've indicated on the wall. Hang the frame on the installed hook or nail.

If the frame feels off-center, use a level to make sure it's hanging straight. Adjust as needed until the frame is correctly positioned.
