

How to Frame Your Tassel

- 1.** First, remove the backboard and mat from your tassel document frame. Next, gently push the tassel shadow box through the backboard.

- 2.** Turn over the shadow box and gently insert the tassel loop into the slit at the top of the shadow box. Position the tassel to your liking.

- 3.** Next, turn the shadow box over and use a strip of acid-free tape to secure the tassel loop to the back of the shadow box.

- 4.** Place the tassel shadow box and backboard back in place before securing the tabs on the back of the frame.
